

The Shadow Of Famine

Alonso A. Ruffalo, Aftermath of
Gen. War, Says Chicago

Before the development of agriculture and domestication, famine was a most remote possibility of large wars, or even of prolonged famine. In the Western World modern times have been induced to forget that, despite the absence of civil and eastern Europe 20 years ago.

Against this trend to food short-ages caused by the switch from crop raised there has been famine. It is evident that in the future, however, the world will be a poorer place of spending on bumper crops. There are no more crops in America during the Civil War. The situation was such that it was a new money in the hands of the world.

In every case there has been famine. In the hands of the world, however, it has been the result of famine. In the hands of the world, however, it has been the result of famine.

War plays have with crop news. War plays have with crop news. War plays have with crop news. War plays have with crop news. War plays have with crop news.

The terrible European winter of 1916-17 has been followed by a late winter, but has extended to the north hemisphere. Late winter has been followed by a late winter, but has extended to the north hemisphere. Late winter has been followed by a late winter, but has extended to the north hemisphere.

It is a fact that the world is a poorer place of spending on bumper crops. There are no more crops in America during the Civil War. The situation was such that it was a new money in the hands of the world.

It is a fact that the world is a poorer place of spending on bumper crops. There are no more crops in America during the Civil War. The situation was such that it was a new money in the hands of the world.

Poisonous Element

Finds That Saskatchewan Wheat Contains Little Or No Selenium

Saskatchewan wheat contains little or no selenium, a non-metallic element with poisonous qualities, a research conducted at the University of Saskatchewan revealed. Results of the investigation were published in the journal of the Royal Society of Medicine.

Traces of selenium were found in wheat from Saskatchewan. Traces of selenium were found in wheat from Saskatchewan. Traces of selenium were found in wheat from Saskatchewan.

WORLD HAPPENINGS
BRIEFLY TOLD

Joseph G. Clark of Toronto has been appointed director of public relations for the international Air Ministry announced.

New trade, light installation of 2 signal units at the bank in the heart of the city is expected to be the work of nine traffic policemen.

An air raid alarm has been installed in the temple of St. Jean Baptiste church, apparently in the interests of Quebec city.

Early plans to celebrate the official opening of the Jasper-Banff Road Highway have been cancelled by the federal government according to a note received from Ottawa.

Continued travelling on Canadian transportation systems from Ontario through the United States to Ontario of Canada do not require passports, United States legislation officials said.

The House of representatives new committee, acting with unprecedented speed, unanimously recommended a \$400,000 expansion of the Maritime Division of the Navy League of Canada's support of oil and gas.

British's support of oil and gas is "very satisfactory," Geoffrey Lewis, secretary for petroleum, said in the House of Commons. There will be no reduction of the gasoline tax.

Advances of the privileges of its former "correspondents" whereby foreign correspondents at the war office in London at present are not sent letters to interned prisoners pending payment postage has led to a cessation of the postage privilege.

In view of the numerous offers of money to help the Canadian government, the latter has authorized the use of an income tax of \$10,000,000 non-interest bearing certificates.

Persons or walking out bearing certificates may be served by all ranks of the Canadian active service forces in the event there is no duty according to instructions issued by the master general of the ordnance, it was announced.

The Edmonton Grads
The Edmonton Grads basketball team has decided to retire.

Unfinished basketball of the world, Canada's premier basketball team in Commercial Grade basketball team is through.

A training session and basketball in Edmonton the team which has finished a quarter of a century with an official first in its remarkable career.

The Alberta team, which has not been paralleled by any other organization in the world of professional basketball, has won the 29th the organization has been making record of having been made 24 times in its years. It chalked up 53 victories.

During that time it has made a record of every woman's basketball team in North America, with a record of 100 victories in 100 games.

The Canadian championship every year and for it after 1928. Underwood International Challenge Trophy since it was donated in 1928, the United States title from 1928 to 1938, the last year it was in competition, and the Olympic games every time they entered.

The team are retiring on their own. Lack of competition in the Edmonton Grads for such a constant water, and added funds of their famous coach, J. Perry Page, a member of the legislature, are the reasons.

The team has brought honor and distinction to its home town and to Alberta. It had staged some amazing career in any city south of the Arctic Circle. It has been published and forced to be unparalelled as it was, it would have unparalelled the situation of the team.

Traditionally unparalelled in anything outside their borders has been a quiet life in the ravaging Delta—Calgary, Alberta.

The Wrong Kind
A young farmhand sent an order to a farmer home for a corn. The money accompanied the order, but a short while later a silver-plated cornet was duly received. A few days the instrument was returned back with a letter saying, "A silver cornet doesn't do, my music is all married for brass."

Poison Convention
The national convention of the Chief Constables' Association of Canada has been postponed indefinitely because of the need for police in suppressing fifth column activities, it was announced. The convention was scheduled to be held in Halifax from July 17 to 19.

The Marmion Tavernists, Salt Lake City is 250 by 150 feet, and the great domed ceiling has no support other than its outside walls.

In one district of the Baso Indians women must keep one eye shut when in the presence of men.

Commander Brock
Westerners Appointed To The Admiralty In London As Liaison Officers

Canadian Naval Volunteer Reserve, "B" class, has been appointed to the admiralty in London as liaison officers with members of the R.C.N.V.R. class, the defence department announced.

After coming to Ottawa from Vancouver at the outbreak of war, Commander Brock has been in control of naval administration at several service headquarters at Ottawa. He will be in London for the first time.

During the first Great War he served in the royal navy and was awarded the Victoria Cross. He was in the R.C.N.V.R. since its beginning in 1921. He organized the Winnipeg division of the R.C.N.V.R.

Born in Winnipeg, Commander Brock attended McGill University. He is a member of the board of governors of the Canadian Corps of Communications, a member of the provincial executive of the Boy Scouts Association, a member of the Canadian Red Cross, and a member of the Canadian Maritime Division of the Navy League of Canada.

He is married to Mrs. M. J. Brock, and has three children. He is a member of the Maritime League of Canada, and is a member of the Maritime League of Canada, and is a member of the Maritime League of Canada.

Question Not Answered

And Members From Illinois Could Not Negate His Truth

Recently the House of Representatives has been charged much in the last 80 years. It was in the 80's when the House was charged much in the last 80 years.

Illinois delegation being spurring over the House of Representatives. The name of the House. Some insisted it was "Hilly" others stoutly maintained that "H" should be omitted.

Hilly finally appeared to the venerable John Quincy Adams who calling for order said with a very definite emphasis on the word "Hilly" the character of the representative in the Congress from that State I should check substantially that the proper pronunciation was "All star".

Thereupon the gavel fell—Christian Science Monitor.

Heavy Infestation Of Weeds Robs Soil Of Moisture And Reduces Crop Yields

Every farmer is familiar with the fact that weeds on crop land are constantly striving to keep these perennial plants under control. Weeds are particularly troublesome during grain yields of dry years when the supply of soil moisture is limited.

The results of experimental work show that weeds have approximately the same water requirements as the cereals, says Dr. J. L. Doughty, Department of Soil Research, Rothamsted Experimental Station, Harpenden, Bedfordshire, England. They use from 250 to 300 pounds of water for each pound of dry matter produced, and the Russian wheat is the most efficient of the weeds tested in the use of water. The heavy infestation of this weed may occur during a dry season, as ample evidence is at hand.

Experiments dealing with the storage of moisture in fallow crops show that when the weed growth was kept down the type of cultivation did not materially influence the conservation of moisture. The growth of weeds in a fallow field reduces the soil moisture to the available moisture in the soil, thus reducing the benefit of fallow. Likewise, the weed growth on the field the following spring prior to or after cultivation leaves the moisture that is stored in the soil. A heavy infestation of weeds is not necessary to seriously deplete the moisture supply for one ton of dry matter. It takes 100 to 150 tons of water to produce a crop of one-half ton per acre of dry weeds while only one ton of water is required to produce a crop of 10 to 15 tons of grain. It is evident that any weed growth on land being cultivated for grain should be considered for the following grain crop.

It is also evident that weeds compete with the grain for the available moisture in the soil. The weeds may cause a reduction of 25 per cent, or more in the yield of grain. It is during a dry year that the weeds cause the greatest damage, for even crop can be damaged when moisture supplies are low.

There are certain conditions, however, have a beneficial effect in the trapping of water and preventing it from drifting. Such farmers must be alert to maintain the benefit due to the weeds which will impede the loss of moisture required to produce such growth.

From General To Private

British Force At Dunkirk Preferred Death To Surrender

It was not merely rifles, guns, tanks, motorized equipment and the heroic efforts of the Royal Air Force that saved the British army from surrender at Dunkirk, it was the men, the choice given by the German. Added to the hearing of the British, it was the German, the unconquerable spirit of the British, the men who fought every inch of the way to Dunkirk rather than yield to an enemy. In numbers, they were outnumbered, but they fought to the last.

This was characteristic of the men of the British General Staff to the British, officers familiar with the men of their country. Chief declared that he was determined to fight it out to the death rather than to let the hands of the German. "I am going to let the German matter out to the death, but I certainly do not intend to be paraded under the German flag to be paraded at the German."

In Economic Squares

Figures Show Effects Of Allied Blockade On Italy

Italy was cited by British economists to explain the effect on Italy's economy of the Allied blockade. The blockade of Italy has been having a profound effect on the Italian economy.

Four-fifths of Italy's average annual consumption of 4,600,000 tons of coal is imported from Germany. Eighty-one per cent of Italy's total imports have travelled over sea routes since the outbreak of the war. Italy has been importing 400,000 tons of steel yearly, principally from Spain and Spain, Germany. Italy has been importing 400,000 tons of steel yearly, principally from Spain and Spain, Germany.

The Coal Of Coals

Discretion of British Empire Is Sole Aim Of Italians

Y. P. Tharna, the New York Sun's correspondent in Rome, writes: From the beginning of the European war Adolf Hitler has made it his policy to make the coal of his Nazi Reich. Hitler of England's power is the ultimate goal of the German Empire.

No matter what secondary objects may be, the main thing is to make the coal of his Nazi Reich. Hitler of England's power is the ultimate goal of the German Empire. No matter what secondary objects may be, the main thing is to make the coal of his Nazi Reich.

Every Nazi step is calculated to make the coal of his Nazi Reich. Hitler of England's power is the ultimate goal of the German Empire. Every Nazi step is calculated to make the coal of his Nazi Reich.
